

HZDR SUMMER STUDENT PROGRAM 2023 IN DRESDEN

About HZDR The Helmholtz-Zentrum Dresden-Rossendorf (HZDR) belongs to the Helmholtz Association, Germany's largest research organization. It houses eight research institutes as well as four large-scale facilities. Students joining the summer program will have the opportunity to learn about scientific work in the fields of

- physics
- chemistry
- biology
- computer science
- geoscience
- medicine

Projects and lectures The projects for the summer students are submitted by the research groups where the students will work during the summer. Once applications are received and participants are selected, a matching process is conducted. The work in the research groups is complemented by a series of lectures designed to provide an insight into the research work in the various areas of the HZDR.

Financial support HZDR provides summer students with free accommodation, a stipend to cover daily living expenses, travel insurance and local bus tickets.

Who can apply?

All advanced undergraduate or master students of natural sciences (physical and life sciences) or related areas.

How to apply?

For more information on the application process, please visit our website: www.hzdr.de/summer

Deadline for applications

Students should apply before **February 28th 2023**
Notification of acceptance:
Middle of April 2023
