

33201 - METHODOLOGY IN CLINICAL TRIALS

Syllabus Information

Code - Course title: 33201 - METHODOLOGY IN CLINICAL TRIALS

Degree: 721 - Máster en Investigación Farmacológica (2018)

Faculty: 106 - Facultad de Medicina

Academic year: 2019/20

1.Course details

1.1.Content area

In this subject the bases to develop clinical trials in humans is addressed. In addition, the tools for a critical and systematic evaluation of a protocol or a published clinical trial are presented and the functioning of the clinical research ethics committees (CREC). Likewise, regulatory and ethical issues of conducting clinical trials with drugs will be also presented.

1.2.Course nature

Compulsory

1.3.Course level

Máster (MECES 3)

1.4.Year of study

1

1.5.Semester

First semester

1.6.ECTS Credit allotment

2.0

1.7.Language of instruction

English

1.8.Prerequisites

Higher degree (Bachelor's Degree) in Medicine, Pharmacy, Biology, Biochemistry, Chemistry, Veterinary Science, Psychology, Nursing or other related degree in the area of Health Sciences.

Secure Verification Code:		Date:	28/11/2019	
Signed by:	This teaching guide is not SVC signed because is not the final version

B2 o similar level of English language.

1.10. Minimum attendance requirement

Minimum attendance 80% (theoretical and seminars/resolution of problems)

1.11. Faculty data

Lecturer(s)- ANTONIO JAVIER CARCAS SANSUÁN (**Coordinator**)

Department of Pharmacology

Faculty of Medicine

Clinical Pharmacology Centre/Clinical Trials Unit

Phone: +34 91 497 53 72

email: antonio.carcas@uam.es

Lecturer(s) JESÚS FRÍAS INIESTA

Department of Pharmacology

Faculty of Medicine

Office Pharmacology – Clinical Pharmacology Laboratory

Phone: +34 91 497 53 34

Email: jesus.frias@uam.es

Lecturer(s) PEDRO GUERRA

Department of Pharmacology

Faculty of Medicine

Office Pharmacology – Clinical Pharmacology Laboratory

Phone: +34 91 497 53 34

Email: pedro.guerra@uam.es

Lecturer(s) FRANCISCO ABAD

Department of Pharmacology

Faculty of Medicine

Office Pharmacology – Clinical Pharmacology Laboratory

Phone: +34 91 497 53 34

Email: francisco.abad@salud.madrid.org

Lecturer(s) ALBERTO BOROBIA

Department of Pharmacology

Faculty of Medicine

Office Pharmacology – Clinical Pharmacology Laboratory

Phone: +34 91 497 53 34

Email: a.borobia@gmail.es

Lecturer(s): ELENA RAMIREZ

Department of Pharmacology

Faculty of Medicine

Office Pharmacology – Clinical Pharmacology Laboratory

Phone: +34 91 497 53 34

Email: relicena@gmail.es

Lecturer(s): RAFAEL DAL RE

Instructor de Investigación Sanitaria

Hospital Universitario Fundación Jiménez Díaz

Email: rfdalre@gmail.com

Contact hours: Previous e-mail appointment is required

1.12.Competences and learning outcomes

1.12.1.Competences

BASIC AND GENERAL

GE1 - Acquire the knowledge, skills and abilities necessary to carry out an innovative quality research in Pharmacology

CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context

CB9 - That the students know how to communicate their conclusions and their knowledge to specialized and non-specialized publics in a clear and unambiguous way

CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.

TRANSVERSAL

T2 - Ability to carry out effective scientific and technical communication, both in a specialized environment and in more general environments, including the educational.

T1 - Ability to carry out a self-learning plan, perform an autonomous consultation of the bibliography and databases at the scientific, technical or regulatory level.

SPECIFIC

ES-2 - Know the potential of new biological, genetic and cellular therapies

ES-3 - Know the basic aspects about the design and obtaining new drugs, both at a chemical and biotechnological level, as well as the scientific, ethical and regulatory aspects that condition it.

ES-8 - Be able to carry out the handling and analysis of data from pharmacological investigations

1.12.2.Learning outcomes

The students will become familiar with the methodology of the clinical trial, as the main methodology of study in humans, as well as with the ethical and deontological concepts associated with this methodology.

1.13.Course contents

I. Theoretical program

1. Introduction to clinical research with drugs (2 hours):

- 1.1. Clinical research with drugs: types of studies
- 1.2. The phases of clinical research with drugs

2. The methodological basis of clinical trials (8 hours).

- 2.1. Clinical trials: definitions, methodological basis, the development of a clinical trial.
- 2.2. Objectives definition, selection of endpoints. Defining the study population.
- 2.3. Types of design: parallel, crossover, sequential, therapeutic equivalence.
- 2.4. Bias in clinical trials. Randomisation and blinding.
- 2.5. Evaluation and detection of ADRs in clinical trials.
- 2.6. Analysis and interpretation of the results of a clinical trial.
- 2.7. Methods of synthesis of scientific evidence: the meta-analysis.
- 2.8. Pharmacoeconomic analysis. Principles of pharmacoeconomic analysis in the clinical trials.

2.3: Pharmacoeconomic analysis: Principles of pharmacoeconomic analysis in the clinical trials.			
Secure Verification Code:		Date:	28/11/2019
Signed by:	This teaching guide is not SVC signed because is not the final version		
URL Verification:		Page:	3/6

3. Clinical development and regulatory ethical aspects (2 hours).

3.1. The regulation of clinical drug development. National and international clinical trials.

3.2. The ethics of clinical research: the role of investigators, regulators and ethics committees. The patient informed consent.

II. Practical program (8 hours)

1. Example of sample size predetermination. Importance of sample size in the interpretation of negative results. (1 hours)
2. Intention to treat analysis. Assessment and analysis of exclusions in CTs. Generalization of the results. Examples of the literature. (1 hour)
3. Evaluation variables in clinical trials, its importance in drug development. Surrogate and composite variables: advantages and disadvantages. Analysis of subgroups. (2 hours)
4. Bias and communication. Clinical Trials Registries. (1 hour).
5. Evaluation of published clinical trials: a practical example and use of evaluation forms (1 hour).
6. Conflict of interests in the implementation and communication of results of clinical trials (1 hour).
7. Practical examples: Communication of adverse drug reactions in the context of a clinical trial and post marketing surveillance. (1 hour).

2. Teaching and learning methodologies and student workload

2.1. Contact hours

TOTAL HOURS OF METHODOLOGY IN CLINICAL TRIALS			
		Nº of hours	%
Presencial	Lectures	12	50
	Tutorial time along the semester	4	
	Seminars	8	
	Final Exam	1	
No presencial	Practical activities and preparation of work in group/seminars	8	50
	Weekly study time	12	
	Exam preparation	5	
Total: 25 hours x 2 ECTS		50	

2.2. List of training activities

activities

LECTURES will provide organized and structured information elaborated by the Lecturer. The lecture content will include the knowledge already established or in very advanced situation, obtained from textbooks, bibliographic reviews, and relevant original papers. Lectures will take 50 minutes, using audiovisual presentations that can be available in the teaching web page.

SEMINARS LED BY THE TEACHER addressing practical aspects in the design or interpretation of clinical trials as sample size predetermination or communication of adverse reactions.

SEMINARS PRESENTED BY THE STUDENTS after individual work and tutorized by the teacher. In this case students made a presentation based on one or more articles published that allows discussion of relevant aspects of clinical trial methodology (i.e., the importance of intention to treat analysis, publication and communication bias) or ethical issues in conducting clinical trials.

3. Evaluation procedures and weight of components in the final grade

3.1. Regular assessment

The final mark (for both ordinary and extraordinary evaluations) will be the result of the marks obtained in the final exam (70%) and in the continuous evaluations (30%).

IMPORTANT: To pass the subject it is compulsory to attend 80 % of the scheduled activities and to have a minimum score of 5/10 points in the final exam. If the student does not pass the

Secure Verification Code:		Date:	28/11/2019	
Signed by:	This teaching guide is not SVC signed because is not the final version			
URL Verification:		Page:	5/6	

exam in the ordinary call, he/she will need to attend the extraordinary exam.

3.1.1.List of evaluation activities

Final exam characteristics (70%)

The exam (for both the ordinary and the extraordinary call) will be mainly based on multiple choice questions and it can also include short questions. The type and date of exam will be announced previously by the coordinator.

Continuous evaluation (30%). Includes:

- Attendance to classes and seminars (10%)
- Seminars (20%). These exercises will be performed during the classroom or non-face-to-face through the Moodle platform. These exercises may have different format depending on the lecturer. They may include: short questions, multiple choice or true/false questions, problems or simulations. The lecturer will announce previously the type and the date of each exercise.

3.2.Resit

It is planned to carry out an extraordinary examination or/and extraordinary essay if needed.

3.2.1.List of evaluation activities

The faculty will decide the format of the examination/essay by considering the aspects in which the student failed.

4.Proposed workplan

Schedule will be uploaded in Moodle:<https://moodle.uam.es/>
