A.4. Indicadores generales de calidad de la producción científica

Dr Lopez-García has worked in the development population studies in Spain, implementing the methodology to measure diet and lifestyles, physical and cognitive function, and the creation of a biorepository. In addition, she has published more than 200 scientific papers in the field of lifestyles in relation to cardiovascular disease and aging. In particular, she has characterized dietary exposures related to the development of physical and cognitive impairment, hearing loss, risk of recurrent falling, and risk of frailty and multimorbidity. She has also examined the biological mechanisms that explain these associations, with a focus on the metabolomic profiles. This work is done with cohort studies from the USA, United Kingdom, the Netherlands and Spain.

Committee of the Spanish Agency for Food Safety and Nutrition, in the Ministry of Consumer Affairs. She is also member of the Scientific Committee and the Steering Committee of the Health Research Institute of La Paz University Hospital, and the Nutrition Group from the Spanish Society of Epidemiology. Since March 2023, she is the chief of the "Observatorio para el estudio de la obesidad. Estrategia NAOS" in the Spanish Agency for Food Safety and Nutrition. Member of the American Society of Nutrition.

She has a formal training in Pharmacy, by the Universidad Complutense de Madrid, a MPH, by the UAM, and she has been a Fulbright Researcher at the Harvard T. Chan School of Public Health, and a Ramon y Cajal Researcher at the UAM.
